

IRTX-11 IR Transmitter

UPCS-5

UPCS-9

The IRTX-11 is designed to be used with the UPCS-5 & UPCS-9 oval button dimming control plates. - It can not be used with the earlier square button plates or with any Touch Pad plate. It has the same 5 & 9 scene selection facilities with scene raise and lower as the UPCS-5 & UPCS-9 oval button dimming control plates. On the UPCS-5 it will also select scenes 5 to 9, if they have been programmed in to the microprocessor control unit.

It is essential that the IRTX-11 is placed face down on a flat surface when the back is removed to replace the battery. If it is turned over whilst the back is removed the internal PCB and selection buttons will fall out.

THE TOTAL SOLUTION

Quantran Systems Limited, Unit 6, Garnett Close, Greycaine Estate, Watford, Herts. WD24 7GN, UK.
